On July 6, 2012, President Obama signed into law a new two year transportation reauthorization bill, the Moving Ahead for Progress in the 21st Century Act ("MAP-21"; P.L. 112-141). This new law includes many important provisions intended to help the Federal Motor Carrier Safety Administration in its important mission to reduce crashes, injuries and fatalities involving large trucks and buses.

Historical background. At the start of the 21st century, the Great Western main line and the Midland Main Line were the last of the major main line routes in the UK using diesel trains as the main source of locomotive power. When the announcement was made in July 2009 to electrify the Great Western (along with the

Liverpool-Manchester line), it represented the first big rail electrification ...

21st-century modernisation of the Great Western main line

Steam locomotives of the 21st century fall into two broad categories: those that use advanced steam technology and are designed to be commercially competitive with diesel locomotives; and those built to more traditional designs for hauling tourist trains. Even locomotives in the second case likely use some modern methods and materials. These include welded boilers, to simplify construction, and ...

Forecasts of life expectancy are an important component of public policy that influence age-based entitlement programs such as Social Security and Medicare. Although the Social Security Administration recently raised its estimates of how long Americans are going to live in the 21st century, current trends in obesity in the United States suggest that these estimates may not be accurate.

A Potential Decline in Life Expectancy in the United
