Figure 5 shows the graph for an item that is too difficult for this population of examinees. The examinee response data do not clearly indicate the correct answer (E); someone attempting to infer the correct option from the graph might well choose distractor (C). Examinees at the 90th percentile performed at the chance level on this item.

Section 3.2: Finding Limits Graphically and Numerically Consider the function $f(x) = \frac{1}{x^2}$. What happens at $x = 1$? We certainly can't find a function value there because $f(1)$ is undefined so the best we can do is to see what happens near the point $x = 1$. To do this we will graph the function.
