Project management is the practice of initiating, planning, executing, controlling, and closing the work of a team to achieve specific goals and meet specific success criteria at the specified time. A project is a temporary endeavor designed to produce a unique product, service or result with a defined beginning and end (usually time-constrained, and often constrained by funding or staffing ...

### **An Approach to Pipeline Integrity Management**

The theoretical foundations of management lie in the classical approach to management, which sought to formulate rational principles that would make organizations more efficient. ! The classical approach to management consists of two subcategories:

### **The Different Approaches and Systems of Management**

Process-based management is a management approach that views a business as a collection of processes, managed to achieve a desired result. The processes are managed and improved by organisation in purpose of achieving their vision, mission and core value. A clear correlation between processes and the vision supports the company to plan strategies, build a business structure and use sufficient ...
