For other properties of concrete, the amount of cement is more important than its characteristics. This report is not a treatise on cement chemistry or concrete.

225R-99 Guide to the Selection and Use of Hydraulic Cements

A cement is a binder, a substance used for construction that sets, hardens, and adheres to other materials to bind them together. Cement is seldom used on its own, but rather to bind sand and gravel together. Cement mixed with fine aggregate produces mortar for masonry, or with sand and gravel, produces concrete.. Cements used in construction are usually inorganic, often lime or calcium ...
