Mathematical and Computational Applications (ISSN 2297-8747; ISSN 1300-686X for printed edition) is an international peer-reviewed open access journal on the applications of the mathematical and/or computational techniques published quarterly online by MDPI from Volume 21 Issue 1 (2016).. Open Access - free for readers, with article processing charges (APC) paid by authors or their institutions.

Computational fluid dynamics (CFD) is a branch of fluid mechanics that uses numerical analysis and data structures to solve and analyze problems that involve fluid flows are used to perform the calculations required to simulate the interaction of liquids and gases with surfaces defined by boundary conditions. With high-speed supercomputers, better solutions can be achieved.

Computational linguistics is an interdisciplinary field concerned with the statistical or rule-based modeling of natural language from a computational perspective, as well as the study of appropriate computational approaches to linguistic questions.. Traditionally, computational linguistics was performed by computer scientists who had specialized in the application of computers to the ...

CTY's mathematics, science, and computer science courses are dedicated to Dr. Richard P. Longaker, Provost of Johns Hopkins University from 1979 to 1987, in recognition of his advocacy and guidance through CTY's initial years. Mathematics can be described as a language, a tool, a science, and an ...

Rutgers Physics News Professor Sang-Hyuk Lee uses 2018 Nobel Prize winning optical tweezers techniques to study molecular forces in biological systems.. Professor Sang-Hyuk Lee and his Rutgers team (Shishir Chundawat, Eric Lam, and Laura Fabris), along with collaborators at Vanderbilt University and Oak Ridge National Laboratory, received a \$1.5M DOE award for this study.
