Advanced Engineering Mathematics, 10Th Ed, Isv This review is for the soft-cover, International edition of Advanced Engineering Mathematics. For the most part this seems to be an okay textbook (I have not used it much yet). However, it has the distinct problem of missing the entire section on probability and statistics, a requirement for my class.

### Advanced Engineering Mathematics: Erwin Kreyszig

This book can be used as either a primary text or a supplemental reference for courses in applied mathematics. Its core chapters are devoted to linear algebra, calculus, and ordinary differential equations. Additional topics include partial differential equations and approximation methods. Each chapter features a selection of solved problems. 1992 edition.
