In music, the dynamics of a piece is the variation in loudness between notes or phrases. Dynamics are indicated by specific musical notation, often in some detail. However, dynamics markings still require interpretation by the performer depending on the musical context: for instance a piano (quiet) marking in one part of a piece might have quite different objective loudness in another piece, or ...

Flight dynamics is the science of air vehicle orientation and control in three dimensions. The three critical

flight dynamics parameters are the angles of rotation in three dimensions about the vehicle's center of mass, known as pitch, roll and yaw.. Aerospace engineers develop control systems for a vehicle's orientation (attitude) about its center of mass.
