anaphora resolution and text pdf

In linguistics, anaphora (/ ˈɛn.əˈfɔːr.ə /) is the use of an expression whose interpretation depends upon another expression in context (its antecedent or postcedent). In a narrower sense, anaphora is the use of an expression that depends specifically upon an antecedent expression and thus is contrasted with cataphora, which is the use of an expression that depends upon a postcedent ...

ACL 2018: Call for Papers â€“ Main Conference

Natural language generation (NLG) is the natural language processing task of generating natural language from a machine representation system such as a knowledge base or a logical form. Psycholinguists prefer the term language production when such formal representations are interpreted as models for mental representations.. It could be said an NLG system is like a translator that converts data ...
