Matrix Editions is a small publishing house founded in 2001, committed to "serious mathematics, written with the reader in mind." Our goal is to publish rigorous books that go beyond correct statements to show why statements are correct and why they are interesting.

Math books from Matrix Editions

A First Course in Linear Algebra is an introductory textbook designed for university sophomores and juniors. Typically such a student will have taken calculus, but this is not a prerequisite. The book begins with systems of linear equations, then covers matrix algebra, before taking up finite-dimensional vector spaces in full generality.

A First Course in Linear Algebra (A Free Textbook)

ii Acknowledgements While the cover of this textbook lists only two names, the book as it stands today would simply not exist if not for the tireless work and dedication of several people.

Basic Technical Mathematics with Calculus SI Version

Leonhard Euler (1755); Published in two books, Euler's textbook on differential calculus presented the subject in terms of the function concept, which he had introduced in his 1748 *Introductio in analysin infinitorum*. This work opens with a study of the calculus of finite differences and makes a thorough investigation of how differentiation behaves under substitutions.
