Chemical thermodynamics is the study of the interrelation of heat and work with chemical reactions or with physical changes of state within the confines of the laws of thermodynamics. Chemical thermodynamics involves not only laboratory measurements of various thermodynamic properties, but also the application of mathematical methods to the study of chemical questions and the spontaneity of ...

Thermodynamics is the branch of physics concerned with heat and temperature and their relation to energy and work. The behavior of these quantities is governed by the four laws of thermodynamics, irrespective of the composition or specific properties of the material or system in question. The laws of thermodynamics are explained in terms of microscopic constituents by statistical mechanics.

Whilst the broad philosophy of the MEng and BEng is the same, students on our Chemical Engineering MEng (Hons) degree are required to study a wider range of technical subjects with additional depth, as well as undertaking a Professional Development Project (PDP).

## **Chemical Engineering BEng (Hons) Degree | Undergraduate**

Course overview. By joining Teesside University's chemical engineering degree you will be on a path to full registration as a chartered engineer with one of the highest earning potentials amongst the engineering professions.

## **Chemical Engineering, BEng (Hons) | Undergraduate study**

Study programme. All Chemical Engineering students study the same core programme for the first two years, covering fundamental science and mathematics and how these apply to practical engineering problems.

Certificate in Data Center Design. The certificate program in Data Center Design is designed so that students in mechanical, civil, and electrical engineering disciplines will take all the required courses in their disciplines, then, take additional courses from other majors (options A, B and C shown below).
