### **beekeeping how to set pdf**

Beekeeping (or apiculture) is the maintenance of bee colonies, commonly in man-made hives, by humans. Most such bees are honey bees in the genus *Apis*, but other honey-producing bees such as *Melipona* stingless bees are also kept. A beekeeper (or apiarist) keeps bees in order to collect their honey and other products that the hive produces (including beeswax, propolis, flower pollen, bee pollen ...

Urban beekeeping is the practice of keeping bee colonies in urban areas. It may also be referred to as hobby beekeeping or backyard beekeeping. Bees from city apiaries are said to be "healthier and more productive than their country cousins". Their presence also provides cities with environmental and economic benefits. Most cities in North America at one time prohibited the keeping of bees, but ...

Figure 4. A tracking of the "frame strength" of 499 hives managed by 11 commercial beekeepers in various states. I classified colonies grading at less than 4 frames of bees in late January as "dinks" (red bars), and excluded their midwinter and final strengths from the means (light blue and green).
