Astronomers combine mathematical models with observations to develop workable theories of how the Universe came to be. The mathematical underpinnings of the Big Bang theory include Albert Einstein's general theory of relativity along with standard theories of fundamental particles.

The Big Bang | Science Mission Directorate

The Big Bang is a scientific theory about how the universe started, and then made the stars and galaxies we

see today. The universe began as a very hot , small , and dense superforce (the mix of the four fundamental forces), with no stars, atoms , form, or structure (called a " singularity ").
