Notes to the Book - Perfect Health Diet | Perfect Health Diet

The life sciences or biological sciences comprise the branches of science that involve the scientific study of life and organisms – such as microorganisms, plants, and animals including human beings.. Life science is one of the two major branches of natural science, the other being physical science, which is concerned with non-living matter.. By definition, biology is the natural science ...

Condensed matter physics is the field of physics that deals with the macroscopic and microscopic physical properties of matter. In particular it is concerned with the "condensed" phases that appear whenever the number of constituents in a system is extremely large and the interactions between the constituents are strong.
