Brain training (also called cognitive training) is a program of regular mental activities purported to maintain or improve one's cognitive abilities. It reflects a hypothesis that cognitive abilities can be maintained or improved by exercising the brain, in an analogy to the way physical fitness is improved by exercising the body.. Although there is strong evidence that aspects of brain ...

Most of us are aware of the importance of willpower, nevertheless, we'll run through the findings of the research. Self-control is a better predictor of academic achievement than intelligence, a stronger determinant of effective leadership than charisma and, brace for impact, more important for marital satisfaction than empathy.
