

chapter 12 stoichiometry prentice pdf

Recommended software downloads: Below are links to general freeware programs that I highly recommend for learning chemistry.

AP Chemistry - Darrell Feebeck

The Prentice Hall International Series in the Physical and Chemical Engineering Sciences had its auspicious beginning in 1956 under the direction of Neal R. Amundsen. The series comprises the most widely adopted

Basic Principles and Calculations in Chemical Engineering

A macromolecule is a very large molecule, such as protein, commonly created by the polymerization of smaller subunits (). They are typically composed of thousands of atoms or more. The most common macromolecules in biochemistry are biopolymers (nucleic acids, proteins, carbohydrates and lipids) and large non-polymeric molecules (such as lipids and macrocycles).

Macromolecule - Wikipedia

An Introduction to Chemistry by Mark Bishop. There are two versions of this current textbook, both containing the same information but organized differently: the "Chemistry-first" version begins with actual "chemistry" — that is, chemical equations and reactions.

Water is the chemical substance with chemical formula H_2O ; one molecule of water has two hydrogen atoms covalently bonded to a single oxygen atom. Water is a tasteless, odorless liquid at ambient temperature and pressure, and appears colorless in small quantities, although it has its own intrinsic very light blue hue. Ice also appears colorless, and water vapor is essentially invisible as a gas.
