9.6 Wide-flange shapes may be preferred despite the structural advantages of closed cross-sectional shapes (like tubes and pipes). © The practical considerations of wide-flange shapes include the following.

### **Chapter 9: Column Analysis and Design**

Welding is a core activity in the fabrication factory, undertaken by skilled, qualified operatives working to a welding quality management system under the control of a Responsible Welding Coordinator. It is used to prepare joints for connection in the shop and on site, and for the attachment of other fixtures and fittings.

Types of simple connections. Simple connections are nominally pinned connections that are assumed to transmit end shear only and to have negligible resistance to rotation. Therefore do not transfer significant moments at the ultimate limit state. This definition underlies the design of multi-storey braced frames in the UK designed as 'simple construction', in which the beams are designed as ...
