Akathisia is a movement disorder characterized by a feeling of inner restlessness and inability to stay still. Usually the legs are most prominently affected. People may fidget, rock back and forth, or pace. Others may just feel uneasy. Complications include suicide.. Antipsychotics, particularly the first generation antipsychotics, are a leading cause. ...

Violence is a significant problem in the United States. From infants to the elderly, it affects people in all stages of life. In 1992, CDC established the National Center for Injury Prevention and Control (NCIPC) as the lead federal organization for violence prevention. CDC is committed to stopping violence before it begins.
