

chemical warfare agents toxicology pdf

Chemical Warfare Agents, Second Edition discusses the physico-chemical properties of chemical warfare agents, their dispersion and fate in the environment, their toxicology and management of their effects on humans, decontamination and protective equipment. New chapters cover the experience gained after the use of sarin to attack travellers on the Tokyo subway and how to deal with the outcome of the deployment of riot control agents such as CS gas.

Chemical Warfare Agents: Toxicology and Treatment, Second

Based upon its toxicology, a strong argument can be made for VX being the most toxic chemical warfare agent with an estimated percutaneous lowest lethal dose in man of 70 µg/kg [18]. Furthermore, in comparisons of acute toxicity with the nerve agents Tabun, Sarin, and Soman, VX is one of the most toxic nerve agents via a wide variety of routes of administration and species [19].
