

chemistry chemical bonding test pdf

In chemistry, an ester is a chemical compound derived from an acid (organic or inorganic) in which at least one -OH (hydroxyl) group is replaced by an -O-alkyl group. Usually, esters are derived from a carboxylic acid and an alcohol. Glycerides, which are fatty acid esters of glycerol, are important esters in biology, being one of the main classes of lipids, and making up the bulk of ...

Ester - Wikipedia

atomic mass The mass of an atom, typically expressed in unified atomic mass units and nearly equivalent to the mass number. atomic mass unit See unified atomic mass unit. atomic number The number of protons found in the nucleus of an atom of a given chemical element. It is identical to the charge number of the nucleus and is used in the periodic table to uniquely identify each chemical element.
