1. 1. Introduction. Preview . Digital image processing is an area characterized by the need for extensive experimental work to establish the viability of proposed solutions to a given

### **Digital Image Processing**

The most common processing approach in the time or space domain is enhancement of the input signal through a method called filtering. Digital filtering generally consists of some linear transformation of a number of surrounding samples around the current sample of the input or output signal. There are various ways to characterize filters; for example:
