Towards understanding the DO-178C / ED-12C assurance case

DO-178B, Software Considerations in Airborne Systems and Equipment Certification is a guideline dealing with the safety of safety-critical software used in certain airborne systems. Although technically a guideline, it was a de facto standard for developing avionics software systems until it was replaced in 2012 by DO-178C .

DO-178B - Wikipedia

i FOREWORD This document was prepared by Special Committee 167 of RTCA, Inc. It was approved by RTCA, Inc. on December 1, 1992. RTCA is an association of aeronautical organizations of the United States of America from both

Checklists for compliance to DO-178C and DO-278A Standards

DO-178C makes room for modern programming practices to be adopted by avionics vendors, ushering in greater cost savings and easier-to-manage project schedules. Based on studies from Boeing and Airbus, the size and complexity of avionics software continues to grow significantly.

DO-178C: Accommodating the Evolution of Software Processes

DO-178C, Software Considerations in Airborne Systems and Equipment Certification is the primary document by which the certification authorities such as FAA, EASA and Transport Canada approve all commercial software-based aerospace systems.

DO-178C | Wikiwand

However, I do know that DO-178B is a living standard, and that all civil avionics software (practically everywhere in the world) on commercial planes these days had to be written to conform to DO-178B in some way.

Avionics Certification: A Complete Guide to DO-178

Certification of Safety-Critical Software Under DO-178C and DO-278A Stephen A. Jacklin¹ NASA Ames Research Center, Moffett Field, CA, 94035 The RTCA has recently released DO-178C and DO-278A as new certification guidance for the production of airborne and ground-based air traffic management software, respectively.

Certification of Safety-Critical Software Under DO-178C

In the case of RTCA SC-205, it is imperative to understand that DO-178B was being updated simultaneously which yielded DO-178C released late, but soon thereafter. As with airborne software (software which either executes onboard an aircraft, or directly influences the execution of such software), CNS/ATM can obviously affect aviation safety.

DO-278A Introduction for Engineers and Managers | AFuzion

With this background, the relationship of DO-178C and DO-278 to the new DO-278A document for ground-based software development is shown. Last, an overview of the new guidance contained in the tool qualification document and the three new supplements to DO-178C and DO-278A is presented.
