

eagle and the wolves pdf

Wolf hunting is the practice of hunting gray wolves (*Canis lupus*) or other species of wolves. Wolves are mainly hunted for sport, for their skins, to protect livestock and in some rare cases, to protect humans. Wolves have been actively hunted since 8,000 to 10,000 years ago, when they first began to pose a threat to livestock vital for the survival of Neolithic human communities.

Wolf hunting - Wikipedia

When Yellowstone National Park was created in 1872, gray wolf (*Canis lupus*) populations were already in decline in Montana, Wyoming and Idaho. The creation of the national park did not provide protection for wolves or other predators, and government predator control programs in the first decades of the 1900s essentially helped eliminate the gray wolf from Yellowstone.

History of wolves in Yellowstone - Wikipedia

Life History. Wolves are social animals and usually live in packs that include parents and pups of the year. The average pack size is six or seven animals, and pack members often include some yearlings and other adults.
