Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

5. Research methodology. Given the organisational nature of the subject under investigation and the design of the meta-model it was clear that a case study that provided the basis for situational analysis was an appropriate research approach , .Time and resource constraints combined with access opportunities meant a single case study was both a pragmatic course of action while also providing ...
