

formulation of shampoo from pdf

Definition: A shampoo is a preparation of a surfactant (i.e. surface active material) in a suitable form which liquid, solid or powder which when used under the specified conditions will remove surface grease, dirt, and skin debris from the hair shaft and scalp without adversely affecting the user. Requirements of Shampoo: 1.

FORMULATION & EVALUATION OF SHAMPOO

Formulation of three investigated shampoos was prepared containing different amounts of Ziziphus spina cristi extract and sodium laureth sulfate as a surfactant. Evaluation of organoleptic, physicochemical and performance tests were performed and compared with herbal marketed product (Cedr shampoo, Sehat Company, Iran).

(PDF) Formulation and evaluation of herbal shampoo from

present scenario, it seems improbable that herbal shampoo, although better in performance and safer than the synthetic ones, will be popular with the consumers. A more radical approach in popularizing herbal shampoo would be to change the consumer expectations from a shampoo, with emphasis on safety and efficacy.
