Speed is the distance traveled divided by the time of travel. For example; if you were to travel a distance of 10 miles in 2 hours time, then your average speed equals 5 miles per hour. $s=d/t$ (s =speed, d =distance, t =time, and the / means to divide). The word velocity is very similar to speed (except velocity also has a direction called a vector) and in most cases we will now use the letter "v ...

Physics, the study of space, time, matter, and energy, is a fundamental component of a liberal education. Introductory courses in physics and astronomy are designed to give students a broad background in the fundamentals of the discipline, an introduction to the logic and philosophy of science, and insight into the understanding and applications of contemporary physics and astrophysics.
