Preparing for Your ACS Examination in General Chemistry

Chemistry is the scientific discipline involved with compounds composed of atoms, i.e. elements, and molecules, i.e. combinations of atoms: their composition, structure, properties, behavior and the changes they undergo during a reaction with other compounds. Chemistry addresses topics such as how atoms and molecules interact via chemical bonds to form new chemical compounds.

With mixed metal oxides as catalysts for water oxidation and O₂ reduction in heterogeneous and biological systems, fundamental understanding of the effects of redox inactive metals on the chemistry of mixed metal oxide clusters is important for the rational development of effective catalysts. Prior to our work, a single high oxidation state complex displaying an oxo bridged redox active ...

SCHEME OF EXAMINATION SYLLABUS FOR B.Tech. in Biotechnology

A chemist (from Greek *khḗm* (*khḗm*) alchemy; replacing *chymist* from Medieval Latin *alchimista*) is a scientist trained in the study of chemistry. Chemists study the composition of matter and its properties. Chemists carefully describe the properties they study in terms of quantities, with detail on the level of molecules and their component atoms. Chemists carefully measure substance proportions ...

Bones and Neutrophils Control Lung Cancer. Tumors are often infiltrated by diverse immune cell types, some of which remain largely unexplored. In a study published in *Science*, the Pittet lab at the MGH Center for Systems Biology uncovers a new type of neutrophil that promotes lung cancer. The production of these neutrophils involves an unexpected remote crosstalk between tumors and bones: lung ...
