Astrophotography is a specialized type of photography for recording photos of astronomical objects, celestial events, and areas of the night sky. The first photograph of an astronomical object (the Moon) was taken in 1840, but it was not until the late 19th century that advances in technology allowed for detailed stellar photography. Besides being able to record the details of extended objects ...

Throughout most of the world where the metric system is observed, guide numbers are expressed as a unitless numeric value like 34, even though they are technically a composite unit of measure that is a two-factor product: "number" ... meters. As such, guide numbers can be reduced either to distance in meters or to "stops" depending on how one uses the guide number in a calculation.
