ieee Guide For Partial Discharge Testing Of Shielded Power

This guide defines methods of measuring partial discharges that may occur in energized power switchgear apparatus in flaws, voids, and interfaces of non-self restoring insulation that may then result in dielectric failure of the switchgear. Guidance on instrumentation and calibration technique is also given.

IEEE Guide For Partial Discharge Testing Of Shielded Power

Corona (partial discharge) is an ionization phenomenon that can cause deterioration in certain insulation systems. Its presence in electronic equipment can be harmful through its manifestation as circuit noise,

spurious voltage or current pulses, or other undesirable effects that lead to circuit malfunctions.
