Preface. Harrison's the principle of internal medicines is a pioneer in the medical field. 1950 is the year in which the first edition got published.

Harrison Principles of Internal Medicine 19th Edition PDF

To further support the assertion that emotional expression results from action of subcortical centers, Cannon and Britton performed further experimental research with cats. Cats were decorticated, and after a period of recovery they spontaneously displayed the behaviours characteristic of intense fury.

Post-concussion syndrome, also known as postconcussive syndrome or PCS, is a set of symptoms that may continue for weeks, months, or a year or more after a concussion – a mild form of traumatic brain injury (TBI). The rates of PCS vary, but most studies report that about 15% of individuals with a history of a single concussion develop persistent symptoms associated with the injury.
