Healthy marine species like whales, sea turtles, coral, and salmon are important for maintaining balanced and thriving ocean ecosystems. We work to prevent marine species populations from decline and extinction, protect them from human activities, and monitor activities that might impact them so they are around for future generations.

An endophyte is an endosymbiont, often a bacterium or fungus, that lives within a plant for at least part of its life cycle without causing apparent disease. Endophytes are ubiquitous and have been found in all species of plants studied to date; however, most of the endophyte/plant relationships are not well understood.

Personal life is the course of an individual's life, especially when viewed as the sum of personal choices contributing to one's personal identity.. In ancient past, most people's time was limited by the need to meet necessities such as food and shelter and there was not much leisure time. People identified with their social role in their community, and engaged in jobs based on necessity rather ...

What is Narrative Therapy? A Definition. Narrative therapy is a form of therapy that aims to separate the individual from the problem, allowing the individual to externalize their issues rather than internalize them. It relies on the individual’s own skills and sense of purpose to guide them through difficult times (“Narrative Therapy”, 2017).
