Reason is the capacity for consciously making sense of things, establishing and verifying facts, applying logic, and changing or justifying practices, institutions, and beliefs based on new or existing information. It is closely associated with such characteristically human activities as philosophy, science, language, mathematics, and art and is normally considered to be a distinguishing ...

Reason - Wikipedia
A formal fallacy, deductive fallacy, logical fallacy or non sequitur (Latin for "it does not follow") is a flaw in the structure of a deductive argument which renders the argument invalid.The flaw can neatly be expressed in standard system of logic. Such an argument is always considered to be wrong.

Fallacy - Wikipedia
Mathematical goals. This lesson unit is intended to help you assess how well students are able to: Interpret speed as the slope of a linear graph.

This study originally arose out of an e-mail discussion with Rafael Capurro at the artefactphil discussion group in 1999. I am therefore indebted to him for important impulses. Cf. Rafael Capurro's analogous article

BeitrÃ¤ge zu einer digitalen Ontologie (Contribution to a Digital Ontology), from which the present study deviates considerably in both content and scope of presentation.

The Digital Cast of Being (Michael Eldred)
Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.
