Evidence-based medicine (EBM) is an approach to medical practice intended to optimize decision-making by emphasizing the use of evidence from well-designed and well-conducted research. Although all medicine based on science has some degree of empirical support, EBM goes further, classifying evidence by its epistemologic strength and requiring that only the strongest types (coming from meta ...

Tort reform refers to proposed changes in the civil justice system that aim to reduce the ability of victims to bring tort litigation or to reduce damages they can receive.. Tort actions are civil common law claims first created in the English commonwealth system as a non-legislative means for compensating wrongs and harm done by one party to another person, property or other protected ...
